**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 22, 25, 27, 28, 30, 32, 33 and 38-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 9912977.7 to Ramsey et al. in view of US 6,089,411 to Baudin et al. (The Examiner has relied on the disclosure of WO 00/750032 for the reference of the GB 9912977.7).

Ramsey show a self-closing valve for dispensing flowable material as seen in Figs. 5 and 6, having a curved membrane 5 with at least a slit opening, a retaining ring 10 substantially in the same plane as an annular connecting wall connecting the membrane and the retaining ring, the connecting wall has an upwardly curved area merging with the membrane forming an obtuse angle between the connecting wall and the retaining ring and an annular protrusion, see the Figs. The valve opens and closes in response to pressure changes within the container 2; the self-closing valve is made of an elastomeric plastic material. Ramsey is silent about the membrane 5 having a constant thickness. Baudin shows a valve member 44, seen in Fig. 4, having a membrane 42a of constant thickness. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the valve member of Ramsey to be of constant thickness to facilitate manufacture or the membrane as taught by Baudin.

*Allowable Subject Matter*

3. Claims 34-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Response to Arguments*

4. Applicant's arguments with respect to claims 22, 25, 27, 28, 30, 32, 33 and 38-43 have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
